

Storm Drain Fund

Storm Drain Fund

Mission Statement

To design, operate, maintain, and manage the storm drain system, which includes monitoring for silt, toxic material, and related pollutants.

Department Description

Storm Drain fees were implemented by the City. These fees are included in the water and sewer utility bills. The revenue collected is expended on designing, operating, and maintaining the storm drains; constructing capital projects; the general management of the storm drain system, including monitoring the system for silt, toxic material and related pollutants.

Financial Management and the Engineering and Capital Projects Department are reimbursed for their administrative oversight of the Fund. The General Services Department's Transportation Division designs, operates, and maintains the storm drain system. Storm Drain funding is used for the National Pollution and Discharge System Cooperative Agreement (NPDES). The Water Department receives storm drain revenue for billing and collecting. A portion of storm drain revenue is also allocated to the Public Liability Claims Fund to cover storm drain-related public liability claims.
